SKILLS:

Languages :	Python, Javascript
Web Development :	HTML, CSS, Javascript, Bootstrap, Tailwind, Reactjs, Gsap, Node.js, Expressjs, MySQL, MongoDB
Developer Tools :	Git, Github, Visual Studio Code

PROJECTS:

Resume-Builder

- Frontend: Built with Vite and React, providing an interactive and fast user experience.
- Backend: Managed by Strapi, handling CRUD (Create, Read, Update, Delete) operations for resumes. It also supports downloading resume data.
- Authentication: Implemented using Clerk for secure user login, registration, and profile management.
- Features: Includes functionality for users to create, edit, update, and delete resume details, with secure authentication and the ability to download resume data

SneakerHub

- Designed and developed a responsive e-commerce frontend website for SneakerHub with dedicated categories for Men, Women, and Kids.
 - Implemented a dynamic cart system allowing users to add, view, and remove items seamlessly.
 - Built with React.js, leveraging reusable components for efficient and scalable code architecture.
 - Integrated state management (e.g., React useState/useReducer) for handling cart updates in real time.
-
