PROJECTS:

Resume-Builder

- Frontend: Built with Vite and React, providing an interactive and fast user experience.
- Backend: Managed by Strapi, handling CRUD (Create, Read, Update, Delete) operations for resumes. It also supports downloading resume data.
- Authentication: Implemented using Clerk for secure user login, registration, and profile management.
- Features: Includes functionality for users to create, edit, update, and delete resume details, with secure authentication and the ability to download a resume.

Blog Application

- Frontend: Built with HTML and Bootstrap for a responsive and clean interface.
 - Backend: Powered by Python Django with SQLite, managing CRUD operations and providing a built-in admin panel.
 - Authentication: Implemented for user login, registration, and profile management.
 - Features: Users can add, edit, like, and comment on blogs with secure authentication.
-
